BOUQUET (20 inch)

EXTRA EARLY - The original Bouquet strain

Flowers are shaped similar to the American Beauty type, fully double and attain a size of 4 inches. Very uniform with a closely compact, upright habit. The earliest Aster strain in cultivation, flowering about two weeks ahead of Queen of the Market. Its large flowers and long stems make it attractive to both home gardeners and florists.

GREENHOUSE PANSIES

FLECK'S WINTER FLOWERING GIANTS

Tall growing greenhouse strain is especially produced for florists, for Winter and early Spring cut flowers. Good range of colors. Sweet-scented, long-stemmed, about 10 in. Blooms about 2 to 3 in. across. Does well from a July or August sowing.

$\frac{1}{2}$ tr. pkt. 65c., tr. pkt. \$1.10, 1/16 oz. \$1.50,
 $\frac{1}{8}$ oz. \$2.75, $\frac{1}{4}$ oz. \$4.90

PHLOX - Drummondii

15,000 S 2-3 weeks 65-75°

Fleck's Dwarf Improved. This mixture contains a riot of fast selling colors, including beautiful pastel shades. It is dwarf—6 to 8 inches. Bushy, compact.

Report from trials at Penna. State College states: "Very dwarf and compact plants." "Color range is excellent and very bright." "We rated it a very excellent sample."

Tr. pkt. 50c., $\frac{1}{8}$ oz. \$1.50, $\frac{1}{4}$ oz. \$2.60, oz. \$7.50.

Twinkle. This wonderful color range in all star shaped flowers was developed from our special strain. Beyond doubt, these Phlox are the finest dwarf, compact, ever available. They represent approximately 9 years of culture to bring them to perfection. Each plant will spread to about 9 in. outdoors. 6 in. tall. Make very cute pot plants for sale during the Spring.

Tr. pkt. 60c., $\frac{1}{4}$ oz. \$1.50, oz. \$5.00

Fleck's Petunias All Doubles

About 4000 seeds to 1/64 oz. 1-2 weeks 70-75°

SAKATA'S NEW GIANT DOUBLES

SAKATA'S New Giant Doubles

These new Giants are a well developed strain far superior to the standards. Dwarf and compact with blooms nearly all 5 inches across. Full double and fringed.

Giant Cheerful. Charming clear pink.

Giant Darling. Rosy carmine. Medium double.

Giant Sunset. Brilliant deep salmon, shaded scarlet. Crop failure. We recommend "Allegro".

Giant Purple Queen. Rich purple, shaded velvety blue.

Giant White Swan. Pure white.

Giant Formula Mixture. All colors in this new class.

Price of all Giants in this section, including mixture:

CANADIAN STRAINS

We recommend Pan American strains.

"CULTURAL HINTS" FOR DOUBLES

Sowing Dates—For pots, November for 5's, and December for 4's for late April and May; for combinations, December and January for 2½'s and 3's for April and May; for bedding, December and January for April and May sales.

Germination—Sterilized peats and leafmolds (if not strongly acid) are good mediums; so are various sterilized mixtures of soil with peat or other organic matter. Don't cover the seed except for perhaps a sheet of paper to keep from drying out. The surface of the flat must be moist till the roots have dug down into the soil. Keep them at 60-65 degs. nights till germination takes place, then 48-50 degs. and dry, but not wilting.

When transplanting a mixed flat, use the smaller seedlings as well as the larger ones, so you will obtain all colors.

The use of Pano-Drench is highly recommended for damp off control.

SAKATA'S STANDARD DOUBLES

PAN-AMERICAN DOUBLES

Allegro. Large, fully double flowers of clear, bright salmon are carried on fairly dwarf plants. A new and attractive color in the All-Double class.

Caprice. Large, deep rose flowers are freely produced on bushy, compact plants of uniform habit.

Light Salmon Double. New addition to this fine group. Fades less than Cotton Candy and we recommend it in its place.

Nocturne. Deep Elk's Pride purple. The medium large flowers are borne on vigorous plants.

Presto. Shades of rose, salmon, pink with white. Variegated. Very striking.

Rhapsody. Deep wine purple. Does not fade. Compact, dwarf.

Sonata. Extra large, pure white flowers. Not as compact in growth as above two, and should be pinched to induce branching.

Each, above: 1/2 tr. pkt. \$2.75, tr. pkt. \$4.50, 1/128 oz. \$8.50,
1/64 oz. \$16.00

Glorious Mixture Improved. Contains a very wide color range. In transplanting, be sure to use both large and small seedlings, thus insuring a complete range of colors.

Calypso

BALLERINA. F₁ Hybrid. ~~ALL-AMERICA® SELECTION~~ Extra large, frilled blooms. Clear, intense salmon. Vigorous and free branching.

BINGO. Very large mahogany Bi-Color.

We recommend Sabre Dance, listed next page.

BLACK MAGIC. F₁ Hybrid. Deep violet blue. More free blooming and vigorous than any grandiflora in this color class. Fringed blooms 3 to 3½ in. Compact. Height 15 to 18 in. Spread 20 to 24 in.

Blue Bell. Medium blue, 2½ to 3 inch blooms. Lighter than admiral.

BLUE LACE. New. Orchid blue. Dwarf ruffled and fringed. Compact, vigorous.

BLUE MAGIC. F₁ Hybrid. Deep violet blue. Free flowering dwarf and compact. Blooms 3 inches. Foliage clean and bright. A great improvement over Admiral.

BLUE MANTLE. F₁ Hybrid. Fringed. Rich velvety violet blue. Uniform, dwarf and compact. Rated the best large flowering violet blue.

BONFIRE. F₁ Hybrid. Dazzling deep salmon scarlet with golden throat. Blooms 3—3½ in. Ht. 8-10 inch. Some growers prefer this to Red Satin.

CALYPSO. New F₁ Hybrid. Brilliant red and white variegated. Blooms 3-3½ in. Dwarf. Compact. Vigorous.

CRUSADER. Striped rose pink on white. Very attractive Gaily striped. Quite uniform and sells well. F₁ Hybrid

FAIRYLAND. An F₁ Grandiflora dwarf fringed Salmon Pink. 8 in. Compact. Blooms 3 in. across.

FROLIC. New F₁ Hybrid. Blooms 6 to 8 in. Complete color range in mixture.

SPECIAL NOTE

Due to the ever increasing number of varieties offered by the hybridizers and seed producers, much duplication and confusion has arisen over which is the best to grow. We have therefore offered here only those varieties which are considered the best in their respective class or color.

Pan-American Seed Company, producer of most of the F1 Hybrids offered today are trying to overcome this confusion by constantly improving their various crosses, but retaining the original name of the variety. An example of this is "Comanche". After taking second place to "Red Satin" — Comanche has been steadily improved until today it is again considered the best red multiflora.

This same constant improvement is taking place with all their varieties. We feel this approach is much better than the old way of giving the improved cross a new name and advertising it as a new variety.

If, however, you should prefer a variety not listed here, include it on your order and we will procure it for you.

LA PALOMA. Pure white with yellow throat. Large, well fringed flowers, 100% Grandiflora. More uniform and vigorous than its predecessor, Snowwhite. Sown in December, La Paloma makes a gorgeously beautiful Easter pot plant.

LAVENDER LACE. Bright rosy orchid lavender. A lively new color. Much admired. Dwarf ruffled and fringed. Compact. Free blooming and vigorous.

MAYTIME. Clear light salmon pink. Fringed blooms 3½ to 4 in. free flowering, compact, uniform, spreading. Height 12 in., spread 24 to 30 inches.

MINSTREL. F1 Hybrid. Rich blue and white grandiflora fringed. Blooms 3 in. White ground. Uniform in habit and marking.

PRIMA DONNA. Improved. New F1 Hybrid. Bright rose pink, 3½ to 4 in. blooms, fringed. Dwarf, compact and vigorous. Spreading habit. Companion to Ballerina.

PSYCHE. F1 Hybrid. New Steel Blue grandiflora dwarf fringed. We recommend Blue Lace.

SABRE DANCE. New sensational. Ruffled extra large grandiflora. Bright crimson and white, 4½ inches across. Mostly with white star pattern. We recommend this in place of "BINGO".

TANGO. Bright, deep scarlet salmon. The brightest color in Petunias. Actually deeper in color than Carmencita, also larger flowered and although not quite so dwarf, makes a blazing mass of color in the garden; still dwarf enough for pot plants. A truly sensational Petunia wherever grown.

TOREADOR. F1 Hybrid. Deep velvety red. Large blooms on uniform, compact plants. Better than King Henry.

WHITE MAGIC. F1 Hybrid. This new, large ruffled Grandiflora is a big improvement over Popcorn. Dwarf and heavy producer.

Prices on any of the above:

About 4,000 S to 1/64 oz. 1-2 weeks 70-75°

CHEROKEE. New F1 Hybrid. Blooms bright deep rose $2\frac{1}{2}$ -3 in. Dwarf, compact and base branching. This was excellent in our trials this year. Attractive.

COMANCHE. Wonderful dwarf; compact grower. 15 in. Scarlet red, deepest red Petunia. Base branching, spreads to 18 in. Free blooming, $2\frac{1}{2}$ to $2\frac{3}{4}$ in. across.

INCA. F1 Hybrid. Rich deep rose red with gold throat. Blooms over $2\frac{1}{2}$ in. Dwarf, compact, base branching and vigorous. Grows 12 to 16 in. high and spreads 20 to 26 in.

LIGHT HEAVENLY BLUE. F1 Hybrid. New shade of heavenly blue.

LINDA. An F1 Hybrid. Somewhat more dwarf and a shade lighter than the well-known F1 Hybrid bedding Petunia, Silver Medal, and a definite improvement over that variety. Light salmon pink.

MARS. F1 Hybrid. Fiery crimson red. Dwarf, compact, vigorous and free branching. A great improvement over King Henry and Velvet Ball.

MERCURY. New F1 Hybrid. Self non pencilled, medium light blue with light yellowish throat. Non fading. Very attractive. Compact and dwarfer than other blues but vigorous.

MOHAWK. Bright rose pink. Same habits at Comanche.

NEPTUNE. F1 Hybrid. Medium violet blue. Excellent dwarf compact.

PALE FACE. F1 Hybrid. Pure white. Very profuse bloomer. Outstanding.

PEACH SATIN. We recommend Sioux.

PINK SATIN. We recommend Venus.

PINK MAGIC. We recommend Prima Donna Impvd. See page 25.

SIOUX. F1 Hybrid. Deep glowing salmon. Profuse bloomer. Excellent.

SUGAR PLUM. F1 Hybrid. A distinctly new color. Bright Orchid pink, pencilled and shaded orchid-purple. Extremely free flowering under all conditions. Sturdy, compact, globe shape. Neat.

VENUS. F1 Hybrid. Bright celestial rose pink. Warmer and brighter than Mohawk. Dwarf, compact and spreading. This will become one of the most popular of our times.

ALL THE BEST—Greenhouse Forcing “SNAPS” Originator’s Packets HYBRID VARIETIES Unless Indicated As Inbred

For best results, do not pinch Hybrid varieties until after benching, and shift before pot bound. Hybrid varieties are best for early sowings for maturity late September to February.

Results of several experiments during the past year indicate that by giving the small snap plants higher temperatures in first few weeks after transplanting, you can advance crop time by about three weeks.

Treatment of small seedlings for four weeks at 65° to 70°F immediately after transplanting will result in about three weeks earlier flowering.

It seems that for best growth, the optimum temperature for the small plants is 65° to 70°, whereas, as the plants get larger, the optimum temperature drops to about 50° to 55°.

Using the above method it was shown that not only did the plants flower earlier, but they also were larger, thus it cannot be said that the earlier flowering, occurred at the expense of leaf and stem growth.

Experiments have shown that earlier flowering occurs if temperature treatment is given during September, October, November and December than at any other time.

Seedlings planted earlier than September usually receive high temperature anyway, and those planted later than December flower rapidly during warm weather. Crop maturing late in December to early May benefited most.

Due to the precise timing necessary for year round production of Snaps, we have indicated the best flowering time for each variety by the letters as listed in the chart below.

A. December, January	E. July, August, September
B. Feb., Mar., Early April	
C. Late April, May	F. September, October
D. May, June	G. November

Dates given below are approximate only, and will vary according to light, temperature, watering, etc.

Perennial Seed for Florists

AND POPULAR BIENNIALS

Every florist who has the available space should grow Perennials. Some are as easily raised as Annuals; quite a few may be forced; some make fine pot plants, and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to Perennials of all kinds. They require little heat, if any, and not much care.

AQUILEGIA - Columbine 15,500 S

Aquilegia McKana's Giant

Seeds germinate in about 3 to 4 weeks. Preferable temperature 65 to 75 degrees. Do well as a source for cut flowers for the retail grower. Plant 12 to 18 apart outdoors. For indoors forcing, pot up 1 year field plants. Store in cold frame or cold place until Feb. 1st. Then start them in low temperature, gradually increasing to about 50 degrees.

FLECK'S DEPENDABLE BULBS

CALADIUM - Fancy-leaved

Bright Colors

Choice bulbs that have been well ripened and carefully selected from excellent strains of highly colored varieties. Our Rainbow mixture contains about 12 of the best colors and combinations of named varieties.

2½ to 3½ in.		6.50	26.00	175.00

Culture

Soil should be slightly acid, pH 6.2 to 6.5. One part leaf-mold, rotted manure and loam. Good drainage is necessary. Mix builder sand with the soil.

Light is important. Give as much strong light as possible without burning leaves, otherwise colors will not be bright.

Temperature should be 80 to 85 degrees, the higher the better. Reduce heat gradually to harden off plants. Start the bulbs in flats and place on steam flows if possible.

Water sparingly until sprouts and roots are 4 to 6 inches long, then shift to 5 or 6 inch pots. Never allow the pots to dry out when in full growth.

Care of Bulbs. Caladium bulbs are sensitive to cold. Unpack your bulbs **immediately upon arrival** and spread thinly in trays. Place in a warm location. When bulbs are left in packing material they may sweat, causing mold and decay. Properly stored bulbs will keep several months.

EXPLANATION OF TERMS

E —forces for Christmas.
EM —generally makes Christmas, good January forcer.
M —forces from Mid-February on.
ML —forces from Mid-March on.

By holding plants cool, Azaleas in any of above categories can be timed for later flowering than indicated.

i.e.—“E” Coral Bells can be from Christmas through Easter.
“ML” K-7 can be flowered for Easter through Mother’s Day.

VARIETAL SELECTIONS

Specific orders will be accepted for a minimum of 5 plants of one variety and size. We suggest, however, for Pericats and Indicas, that varietal selection be left to us in order that you get best choice of stock. We have smaller stocks of un-listed varieties that are just coming into production. On unspecified orders it is generally possible to include some of these newer items. Substitutions on specified orders will be made only where necessary, and major substitutions will be made only with consent of buyer.

CULTURAL DIRECTIONS

Before Arrival of Plants:

A proper storage location should be selected and prepared so that plants can be placed without rehandling. Hardy varieties can be kept in cold frames with mat and sash protection, provided the winters are not excessively cold. Tender types should be placed in cold greenhouse or heated frame

It is generally convenient to heel plants in peat moss. Peat should be new or sterilized to minimize disease problems.

On Arrival:

Plants should be placed in desired location so that tops are just touching. They should be thoroughly watered at this time. Plants with frozen root-balls should be placed in a cool, dark location until thawed.

Temperature During Dormancy:

Azaleas should be held as cool as possible during the day, and night temperature during Fall and Winter should be maintained slightly above freezing for best curing. Hardy plants stored in cold frames can tolerate freezing conditions, if frames are tight and covering is adequate.

Light During Dormancy:

Full light seems best for dormant plants, but they can also tolerate semi-shading during dormancy. During warm Springs it may be necessary to shade houses in order to keep plants in a dormant condition.

Water and Fertilizer:

Plants should be kept moist during storage, and frequent syrings are desirable. Amount of water needed depends on light and temperature. It is best to water plants in the morning so that they will be dry by night. Light feedings at 6 or 8 week intervals during storage seem helpful in maintaining foliage and color.

Insecticides and Fungicides:

Generally not necessary during storage. It is advisable to spray or fumigate plants at the start of forcing, however

Further instructions, next page

AZALEA

CULTURAL DIRECTIONS (Continued)

Potting:

Plants may be potted at anytime during dormancy. Potting should be completed before the start of forcing period. It is generally necessary to prune roots in order that plants will fit in proper pots. Azaleas look best in 3/4 or "Cyclamen" pots. A 4/6 will generally fit in a 4" pot, a 5/7 in a 5", a 6/8 in a 5" or 6", an 8/10 in a 6" or 7", etc.

Forcing:

This is largely a matter of timing (see accompanying schedule). Careful watering is essential, and otherwise little other care is necessary. On some varieties, leafy growth will begin around flower buds before plants bloom. This growth should be removed for best appearance of the plants.

FORCING FOR MOTHER'S DAY BLOOM:

During late April and May, sunlight is often too intense for Azaleas coming into bloom.

It is advisable to use a light shading on greenhouses during this period. You will generally find that stock will "drift" into bloom with very little heat. A night temperature of 50° is usually adequate.

SHIPPING

All prices are F.O.B. Linwood, N. J. We make truck deliveries within 500-600 miles at nominal cost. Remote orders are generally packed and trucked to nearest express office to save you excessive transport charges. Where truck delivery cannot be arranged, all shipments are made via Railway Express, unless otherwise instructed.

TIMING THE FORCING OF AZALEAS

	E wks.	EM wks.	M wks.	ML wks.
*Christmas Bloom.....	5-6	6-7
January Bloom.....	4-5	5-6	6-7(?)	..
February Bloom.....	3-4	4-5	5-6	6-7(?)
March Bloom.....	2-3	3-4	4-5	5-6
April Bloom.....	1-2	2-3	3-4	4-5
May Bloom.....	..	hold cool 2	2-3	

Above estimates are reasonable approximations for forcing time at temperatures of 60-65 at night. Higher temperatures will hasten forcing. If storage temperatures prior to forcing have been rather warm, plants will come into bloom more rapidly than indicated.

Despite the "rules" there is no substitute for good judgment and careful observation in order to assure best flowering at the proper time.

TIMING OF PLANTS

Timing the bloom of Azaleas requires your close attention to the condition of the plants. Easter is particularly important and we use it as an example.

3 Weeks before Easter—buds should be well developed but should show little or no color.

2 Weeks before Easter—buds should be showing good color, with perhaps one or two open flowers.

1 Week before Easter (Palm Sunday)—all buds fully colored, perhaps 1/4 of flowers open.

We offer these items for direct shipments from only the most reliable specialists.

We cannot guarantee safe arrival as this is entirely beyond our control. If shipments are spoiled or damaged in transit, take delivery and get "Exception Report" from expressman at time of delivery and proceed to collect from Express Company.

All prices F.O.B. source and subject to market changes. Prevailing price as set by the producer will be charged at time of shipment, plus packing charges, if any.

All orders are booked subject to the growers' ability to ship at proper time.

We cannot accept orders with specific delivery dates. Minimum Order for Plants or Cuttings \$20.00.

BIRD) Peat Pots Have Strength and Nutrition

Special ingredient gives added rigidity—helps prevent breakage during shipping and handling. Roots penetrate freely after initial watering. Nutrient promotes healthy growth. For annuals, bedding plants, vegetable plants—especially when you perform transplanting operation.

TO THE BUYER

It's unwise to pay too much, but it's worse to pay too little. When you pay too much, you lose a little money—that is all. When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing it was bought to do. The common law of business balance prohibits paying a little and getting a lot—it can't be done. If you deal with the lowest bidder, it is well to add something for the risk you run. And, if you do that, you will have enough to pay for something better.

COLORFUL PETUNIAS ACCENT THE MODERN LANDSCAPE SCENE

Evergreens and other nursery subjects are shown off to the fullest advantage when highlighted by a special display of color. Petunias bred by Pan American Seeds, Inc. offer the maximum in blooming qualities. Choose from large informal flower types, small uniform flower types, solid colors, striped, starred, doubles . . . all in a complete range of new and popular colors.

Planting tips—Petunias are easy to grow . . . they tolerate many soil types, grow well in sun or light shade, and seldom need spraying or special attention. When planting petunias, space about 10-12 inches. For maximum color display make mass plantings. However, small groupings informally spaced can be very effective in accentuating your favorite nursery subjects.

THE TOP TEN GRANDIFLORA PETUNIAS

BALLERINA—ALL-AMERICA SELECTION Deep glowing salmon pink.

BLUE LACE—Soft cool orchid blue—veined purple.

BLUE MAGIC—Deep violet-blue. Early, free flowering.

CRUSADER—Striking rose and white. Early.

FIRE DANCE—ALL-AMERICA SELECTION Deep scarlet with yellow throat.

LA PALOMA—Pure white, soft cream throat.

LAVENDER LACE—Rosy orchid pink, fringed petals.

MAESTRO—Deep intense rose with yellow cream throat.

MAYTIME—ALL-AMERICA SELECTION Lovely light salmon pink.

TANGO—Large flowered scarlet. Very outstanding.

THE GLORIOUS DOUBLE PETUNIAS

Always a popular favorite, these Pan American double petunias still rival the newer single hybrids.

Popular colors:

ALLEGRO—Deep coral salmon.

CAPRICE—Warm bright rose.

MINUET—Lovely orchid lavender.

All varieties are uniformly dwarf, vigorous and compact, with huge full double flowers.

NOCTURNE—Deep midnight purple. **RHAPSODY**—Wine purple.

PRESTO—Pretty rose and white. **SONATA**—Giant pure white.

PLANT MULTIFLORA PETUNIAS

FOR MASSES OF COLOR

COMANCHE—A.A.S. Unequaled for vivid splashes of flaming red. New deeper color and weather tolerance. Compact, sturdy plants.

MERCURY—New light Heavenly Blue hybrid. The first dwarf light blue. Progress in breeding this color obvious in this year's crop.

NEPTUNE—This light violet blue fills the gap between Mercury and Blue Magic. Lovely with yellow Rocket Snapdragons.

SATELLITE—Millions of scintillating white stars on bright rose pink. Early, compact. A terrific bloomer.

SUGAR PLUM—New and different. Already very popular. Bright orchid on plum purple center. Excellent habit and weather resistance.

VENUS—New lovely Celestial Rose pink on extra dwarf, vigorous, compact, free blooming plants. A real hit!

Other Pan American Multiflora petunias not shown:

PALEFACE—A.A.S. White—solid masses.

LINDA—The prettiest light salmon pink.

SIOUX—Rich coral pink.

AZTEC—Brilliant scarlet with yellow throat. Brightest red in regions where best adapted.

INCA—Brightest, deep rose-red.

COMET—Deep crimson red, perfect white star. Compact, early.

MARS—Deep velvety crimson.

ROCKET SNAPDRAGONS

A.A.S. New for 1960. A smash hit. For the first time hybrid garden snapdragons—in fact the first to be bred especially for the American climate.

Seven colors, separate or mixture of all. Rose, White, Yellow, Pink, Orchid, Bronze and Red.

FLECK'S LILIES Finest True Strain, Highest Bud Count
N. W., U.S.A. GROWN

Those who grow our brand of these fine Lilies, always reorder. There must be a reason

EASTER 1962 IS APRIL 22

ACE—American Grown

Produce a smaller plant than does the Croft, also Ace foliage "points up", which means less bench room. Bud count is generally higher than that of a comparable sized Croft bulb. Slightly earlier than Croft.

PACKED AS FOLLOWS:

Size 7/8, 250 bulbs per case.....\$33.00
Size 8/9, 200 bulbs per case.....98.00
Size 9/10, 150 bulbs per case.....85.00

CROFT—American Grown

Order now for Easter 1962 forcing.

7—8—250 bulbs	\$62.50
8—9—100 bulbs	44.00
8—9—200 bulbs	81.60
9—10—150 bulbs	74.00
10—11—100 bulbs	62.00

QUANTITY DISCOUNTS—5 to 9 cases, 5%
10 cases up 7 1/2 %.

Compare Lily bulb prices by the bud count, not by the case. Our Croft are priced low on the basis of blooms per bulb.

For those who cannot maintain an even 60 to 65 degrees (night temp.) we recommend precooled bulbs. Orders for precooled bulbs must be in our hands by Aug. 1st. No charge for precooling.

Croft Lilies are easy to grow by observing a few simple rules. Cultural directions sent with order or on request.

REGALS—American Grown

Our fine strain especially good for outdoor cut.

White, flushed pink near base of bloom. 8/9 in. cased 200 for \$48.50. Less than case, \$25.00 per 100.
